## KEYNOTE: Evolving past Exascale

*Thursday, 1 December 2022 16:30 (1 hour)*

Join Trish Damkroger, Chief Product Officer, SVP and GM of HPE's High Performance Platforms, Solutions and Engineering team as we discuss the art of the possible.

Focusing on purpose-built solutions for your organization, we will cover our acceleration into the Exascale Era and how to realize new business value and gain insights with the convergence of modelling & simulation and AI. We will be presenting on how you can access supercomputing technology and empower your most complex workloads with optimized solutions.

Also, find out how HPE will help CHPC research community to work with the pre-Exascale community. This community of converged HPC supercomputing is changing how we look at science and how we start providing insight and benefits beyond academics and bringing those benefits to humanity.
