

## **Computing Infrastructure at the South Africa Radio Astronomy Observatory: Past, Present and Future**

*Wednesday, 30 November 2022 13:45 (30 minutes)*

The Square Kilometer Array (SKA) global mega science project stands to have a continued significant positive impact on the South African science, research, technology and innovation space. A computing infrastructure perspective of the past, present and future of those impacts will be presented. As the South African Radio Astronomy Observatory pivots to become the host of the SKA1 Mid frequency radio telescope, we look at SARAO's roles and future directions.
