Tape Library: NICIS-DIRISA Spectralogic Maktech Case Study

Tape Library: NICIS-DIRISA Spectralogic Maktech Case Study

Presenters: Claude Fortune: NICIS-DIRISA System Administrator, Miguel Castro: Spectralogic Advisory Solutions Architect

This case study showcases the capabilities of the DIRISA Tape Library for the Long-Term Archival service.

The journey from conception to production is highlighted in this case study. The transfer of large datasets from CHPC Lustre through iRODS into the Pretoria Tape Library will be demonstrated.

Through this live demonstration, it is intended to introduce to the Research community DIRISA's Tape Archival storage system.

Student or Postdoc?
