## **KEYNOTE 7: Bringing AI Everywhere**

*Thursday, 7 December 2023 17:00 (45 minutes)*

In this talk, we will uncover different approaches to implement, deliver, and democratize AI solutions. Each approach will fit different use cases. We can use Datacenter CPU, GPU, a specialize AI accelrators, or Edge. This way, AI developers will have the flexibility and agility to implement the most efficient solution. We will also touch base on how AI and HPC are merging together and how we see the future looks like.

### **Student or Postdoc?**
