A forward-looking retrospective of the South African quantum ecosystem

It has been five years since IBM Quantum and the University of Witwatersrand announced their collaboration to bring quantum computing to the African continent. From the start, the goal was to provide much more than quantum hardware and IBM Quantum has made significant contributions to help build the local quantum ecosystem. Reviewing these contributions, what still needs to be done to ensure that South Africa is not left behind as the world steps into a new quantum era?
