Challenges With Implementing FAIR Data Standards

Tuesday, 2 December 2025 15:30 (20 minutes)

The FAIR principles have become the best practice for sharing artifacts, such as data, with the public. Findable, Accessible, Interoperable, and Reusable each seem straightforward, but as implementation details are worked through many difficult decisions and unclear meanings are revealed. This talk will look at common practices and challenges with implementing these principles when sharing digital artifacts.
