Chemistry and Material science

In the last few year members of the Chemistry and Materials Science SIG expressed the need for a forum to present their work. Especially for students working in HPC to be exposed to experts in the field of research. However, due to the diversity of the application in the field of HPC the only common denominator for all the researchers in this field is the use of the CHPC.

For this reason the organisers of this proposed session would like to suggest the following:

A dedicated Chemistry and Material Science SIG session consisting of slots for keynotes, ordinary oral presentations, student oral presentations as well as flash poster presentations.

The program should also include a slot for the annual SIG meeting and announcement of best student oral presentation as well as the best poster in Chemistry and Material Science. The program of the SIG session and the abstracts of the talks to be presented, should be published as part of the CHPC meeting program in the book of abstracts.

Presenter Biography

Primary authors: CONRADIE, Jeanet (University of the Free State); VAN SITTERT, Cornie (North-West University); Prof. LANDMAN, Marile (University of Pretoria)

Presenters: CONRADIE, Jeanet (University of the Free State); VAN SITTERT, Cornie (North-West University)

Session Classification: Chemistry and Material Science SIG Seminar

Track Classification: Chemistry and Material Science SIG Seminar
