CHPC Industry engagement session

Thursday, 6 December 2018 11:00 (1h 30m)

The CHPC will be engaging with its non-academic users on Thursday 6 December. The format of the meeting will be similar to previous years, and mostly involves receiving feedback from the active commercial and public sector user base.

The purpose of the meeting is to strengthen collaboration with the non-academic users, exchange experiences and discuss the way forward. Attendees who are currently active CHPC users will be requested to give a short introduction to their HPC-related work.

Although the focus of the meeting will be to engage with past and current non-academic users, the meeting will also be open to any individual or organisation wishing to learn more about what the CHPC offers to industry and the public sector.
