KEYNOTE 4: Security Intelligence: Data to Cyber War

Tuesday, 4 December 2018 09:45 (45 minutes)

The advent of the fourth industrial revolution results in devices, endpoints and sensors continually being added to extract and gather data from networks, systems and people. Ensuring security on all these entities is vital, but more so the ability to move from data to information to knowledge and finally intelligence in this big data environment. In terms of the cyber warfare space, power will be in the hands of those who control information and that can extract, analyse and apply security intelligence in a dynamic environment.

Presenter Biography

Primary author: Prof. BIERMANN, Elmarie (Cyber Security Institute)

Presenter: Prof. BIERMANN, Elmarie (Cyber Security Institute)

Session Classification: KEYNOTE 3: Prof Elmarie Biermann, Cyber Security Institute
