Overview of HPC course and textbook

Wednesday, 6 December 2017 11:00 (1h 30m)

Prof. Thomas Sterling (Indiana U.) will provide an overview of his HPC course and new textbook. This course, which provides a modern and accessible introduction to HPC, has been developed and thoroughly field-tested at Indiana University and is now being adopted at universities across the US. Significant resources, including 80 hours of lecture videos, course slides, student exercises and project material, will be made available free of charge. Prof. Sterling has a long relationship with CHPC and has been extremely enthusiastic in his support for HPC education in Africa.
