2017 HPC Landscape and Technology Trends

Monday, 4 December 2017 15:30 (20 minutes)

As the exascale era approaches, the landscape of high performance computing is changing rapidly. The advent of AI and machine learning has emerged as a major influence in HPC system and component design, and has encouraged users to rethink their traditional workflows. TOP500 News Editor Michael Feldman will recap some of the most important developments in this area that took place over the last year and discuss the broader ramifications for the HPC community.
